

INDICATIONS: BALANCE Stress & Dehydration Aid helps animals which are experiencing metabolic imbalances and dehydration due to stress events.

BALANCE Stress & Dehydration Aid is a nutritional/metabolic supplement that can be administered through the drinking water or added to the feed of livestock and poultry. BALANCE Stress & Dehydration Aid was specially engineered for use in animals that are anticipated to be or are experiencing dehydration and metabolic stress from events including extended transport, high heat index periods, environmental extremes, disease stress, market transport, and other periods where feed and water intake may be reduced.

INGREDIENTS:

Sodium Min. 27% Zinc Min. 300 ppm
Potassium Min. 10% Protein Max. 1%

STORAGE: Store at a room temperature below 30° C (86° F). BALANCE Stress & Dehydration Aid is not harmed by freezing. Close container between uses to prevent clumping.

DIRECTIONS FOR USE: Begin treating livestock and poultry one day prior to and during the entire stress period.

Water Administration:

- **5 Gallons:** Administer BALANCE Stress and Dehydration Aid at 1 level tablespoon (17 grams) per 5 gallons of drinking water.
- **Water medicator:** Administer BALANCE Stress & Dehydration Aid at 3 cups per 5 gallons of stock solution metered at 1 ounce per gallon (1:128) of drinking water.
- **Water tank:** Administer BALANCE Stress & Dehydration Aid at 3 cups per 640 gallons of water (each cup treats approximately 21,300 pounds of livestock or poultry or 213 gallons of drinking water).

Feed Administration:

Administer BALANCE Stress & Dehydration Aid by adding 1 gram per 3 lbs. of complete feed or 3 cups (780 grams) per ton of complete feed. (This will equate to 1.2 grams per 100 lbs. body weight per day.)
